

KEY PERFORMANCE INDICATORS

The development of safety shall always be linked with goals and strategies of our academy.

KPI's makes it possible to monitor our progress or results seen in relation to specific safety objectives. Then you can group them to better understand how changes in certain KPIs might affect other parts of the business strategy.

If you don't have a goal, you don't know where to aim.
If you can't monitor or control your ability to aim, you don't know the result of your efforts.
